EDUCATION

Stony Brook University

Master of Science in Applied Math (Focus in AI/ML)

Stony Brook, NY

Jan 2026 – May 2027

Stony Brook University | GPA: 3.50/4.0

Bachelor of Science in Computer Science ; Applied Math

Stony Brook, NY

Aug 2023 – Dec 2025

- **Coursework:** Data Structures, Advanced Algorithms, Operating Systems, Computer Networks, Artificial Intelligence, Probability Theory, Statistical Learning, Fundamentals of LLMs, Software Engineering

EXPERIENCE

Betterment

Software Engineer Intern

June 2026 – August 2026

New York City, NY

- Built **Ruby on Rails** workflows for 401(k) payroll ingestion across HTTP/SFTP feeds.
- Added validation and error handling for malformed provider payloads before contribution updates.
- Instrumented async payroll jobs with **Datadog** logs, alerts, and dashboards, cutting triage **24%**.
- Implemented idempotent retry logic for timeouts and partial failures in payroll sync jobs.

Acadia Analytics

Software Engineer Intern

May 2025 – August 2025

Cambridge, Massachusetts

- Built **time-series** forecasting pipelines for market data, standardizing features and rolling evaluations.
- Reduced retraining latency **30%** by parallelizing preprocessing and caching reusable feature sets.
- Automated **100+** rolling backtests and LLM summaries, significantly reducing manual analyst review effort.
- Optimized REST and SQL access to forecast outputs, reducing p95 dashboard latency **18%**.

Desung

Software Engineer Intern

Jan 2024 – August 2024

New York City, NY

- Developed internal **debugging** dashboard for puzzle QA, tracking pass rates, move histories, and failure patterns.
- Built analytics views for **50+** engineers and testers, improving QA visibility into failure patterns.
- Added Docker, Jenkins, and GitHub Actions CI checks to improve multiplayer release reliability.
- Implemented multiplayer backend endpoints and analytics logging, sustaining **97.3%** uptime in testing.

PROJECTS

Clinical Trial Copilot | *Next.js, TypeScript, FastAPI, Cerebras, PostgreSQL, LangChain, Pandas*

- Built FastAPI services for clinical-trial PDF ingestion, structured extraction, and metric storage in PostgreSQL.
- Parallelized PDF ingestion and parsing jobs, reducing end-to-end document processing latency by **35%**.
- Modeled endpoints, interventions, outcomes, and metadata in PostgreSQL for **10+** trial comparisons.

Seawolf Course Finder | *AWS (EC2, RDS), PyTorch, scikit-learn, BeautifulSoup4*

- Launched AWS course search for **4,000+** SBU classes, serving **50K+** monthly queries under 1s.
- Scraped and normalized catalog and prerequisite data, indexing records for semantic search.
- Deployed Flask services on EC2/RDS with caching to keep search sub-second during registration.

AWARDS AND LEADERSHIP

Hackathon Winner — Stony Brook University HopperHacks (2025)

Datathon Winner (Financial Analysis Track) — Stony Brook Datathon (2025)

Business Analytics Club — Co-Founder and Secretary

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL, TypeScript, R, JavaScript, Bash

Backend: FastAPI, Flask, Rails, Express, Node.js, REST APIs, GraphQL, tRPC

Databases: PostgreSQL, Redis, MySQL, MongoDB

Cloud/DevOps: AWS EC2, RDS, S3, Docker, GitHub Actions, Jenkins, Linux

ML/Data: PyTorch, scikit-learn, Pandas, NumPy, LangChain, time-series forecasting

Data Systems: feature engineering, model evaluation, backtesting, data pipelines
